CURRENT RESEARCH PROJECTS

PROJECT I. *Language Attachment: Normative Features, Individual Differences, Implications for Value- and Self-Transformation*

This project further develops the conception of language attachment in my dissertation on *Learning A New Language as A Transformative Experience*. There are currently four papers under this project.

- A paper on being attached to a language and its relationship to personal transformation (under review)

- A paper on normative aspects of attachment (under review)
- A paper on a topology of attachment to a language (draft available upon request)
- A paper on measuring individual differences of attachment to language (drafting questionnaire surveys and interviews)

PROJECT II. *Codeswitching, Narrative Intersectionality, Attachments to Cultures & Communities*

This project is another further development on the nature of attachment, focusing on attachments to culture and community based on the analysis of the phenomena of codeswitching. There are two papers under this project.

- A paper on narrative unity and codeswitching (draft available upon request)
- A paper on codeswitching, rational decision making, and transformative experience (draft available upon request)

PROJECT III. *Translation as Testimony*

This new project investigates textual translation. There are three papers under this project.

- A paper on translation as testimony (preliminary literature review)
- A paper on thick translation (preliminary literature review)
- A paper on concepts, traditions, and translation: helping students appreciate classical Chinese philosophy

PROJECT IV. *Aesthetic Appreciation*

This is another new project, focusing the epistemic barriers of appreciating literary and philosophical texts in some languages

- A paper on epistemic barriers and the opacity of appreciation (draft available upon request)

SUMMARY OF DISSERTATION AND THESIS RESEARCH

Dissertation Research at UNC-Chapel Hill and Yale University | 2018-2020

- Conducted in-depth case analyses of adults’ language learning experiences, including native English speakers learning classical and modern Chinese, deaf adults learning ASL, and indigenous groups learning modern English
- Analyzed positive, negative, and traumatic transformative effects of language learning based on conceptual investigations and empirical studies on childhood and adulthood attachments
- Developed a rigorous concept of language attachment to understand the connections between attachment behaviors and language learning experiences
- Applied philosophical theory of transformative experience, psychological studies of attachment, and second language learning to analyze and influence language learning experiences in real life

Dissertation Research at Renmin University of China | 2010-2012

- Conducted in-depth analyses of thirteen historical and modern proofs of the Fundamental Theorem of Algebra
- Analyzed analytic, algebraic, geometrical, and topological methods and techniques used in the thirteen proofs
- Proposed four forms of explanatoriness—rigorousness, simplicity, primitiveness, and conceptual novelty
- Improved philosophical theorization of mathematical explanation by articulating diverse epistemic virtues of the thirteen proofs and using these virtues as a guide to explore further virtues in other proofs

Bachelor Thesis Research at Lingnan Normal University | 2005-2006

- Explained conflicts between the Independence and Weak Order Axioms in Subjected Expected Utility Theory and two types of decision-making phenomena in real life—local context and cyclic preference
- Applied Skew-Symmetric Bilinear (SSB) Theory to explain local context and cyclic preference based on SSB's explanation of Allais's paradox

TEACHING EXPERIENCE**Instructor of Record at UNC-Chapel Hill**

- IDST 89 -- Language we live by: Language in Cognition, Education, and Organization
An interdisciplinary, first-year seminar that I co-designed and co-taught with two Ph.D. candidates
- PHIL 213 -- Asian Philosophy (online and in-person)
Intermediate undergraduate course on Asian philosophy
- PHIL 110 -- Great Works in Philosophy
Introductory undergraduate course on western philosophy
- PHIL 154 -- Philosophy of Social Science
Introductory undergraduate course on philosophy of social science
- PHIL 155 -- Mathematical Logic
Introductory undergraduate course on mathematical logic
- PHIL 101 -- Introduction to Philosophy (online)
Introductory undergraduate course on metaphysics, ethics, and epistemology

Teaching Assistant

- Central Problems, Great Minds, Big Ideas
(Supervised by Ram Neta, *Introductory course on the meaningful and good life*)
- Critical Thinking
(Supervised by Ram Neta, *Introductory undergraduate course on critical reasoning and informal logic*)
- Mathematical Logic
(Supervised by John T. Roberts, *Introductory undergraduate course on mathematical logic*)

Instructor of Record at Western Michigan University

- PHIL 2200 -- Critical Thinking
Introductory undergraduate course on critical reasoning and informal logic

Mathematics Teacher (Education Practicum) at Affiliated High School of Lingnan Normal University

- Taught algebra and geometry to 63 freshmen, designed curriculum and tests
- Collaborated with specialists, diversified teaching techniques and learning tools for students with different ability levels
